Summary

ML-focused software developer with a strong React frontend background. Built semantic retrieval for **13,007** tenders and a retail computer-vision prototype; accelerated repeat data imports from **~48 s to ~1.5 s** in a local benchmark. Combines applied ML, data pipelines and product interfaces with ongoing training at ML School Kazakhstan and a Software Engineering degree in progress.

Experience

Bnect | Software Developer (DS Engeneer) Apr 2026 - Present

- Built a tender recommender for **13,007** records using multilingual E5 embeddings and PostgreSQL/pgvector; combined semantic ranking with explicit region and deadline filters.
- Reduced repeat import time from **~48 s to ~1.5 s** by removing repeated Excel traversal and per-row queries (local benchmark; unchanged input, precomputed embeddings).
- Implemented offline, quantized ONNX inference on CPU, query caching and embedding-version checks to keep retrieval consistent after model changes.
- Developed React/TypeScript workflows for tender discovery, purchase-price analytics and a PCA vector map.

Projects

SecureGuard | Retail computer vision

Built a prototype combining YOLO detection, ByteTrack tracking and POS event matching with a React review dashboard. Implemented dataset leakage checks, versioned model artifacts and ONNX export tooling.

QazScope | Seller analytics

Developed CSV/XLSX imports, financial reconciliation, pricing simulations and interactive React dashboards, with PostgreSQL tenant isolation and recoverable background jobs.

Frontend portfolio | Commercial and personal projects

Built React interfaces for Goleador and Golden Students Club, alongside productivity tools and browser games; focused on reusable components, API integration and responsive UI.

Skills

Languages Python, C++, Java, C#, JavaScript, TypeScript, SQL and etc
ML and data Sentence embeddings, semantic retrieval, E5, ONNX, pgvector, OpenCV , LORA etc
Development React, .NET, HTML, CSS, REST APIs, PostgreSQL, Docker, Git and etc

Education

Astana IT University 2024 - 2027

BSc in Software Engineering - in progress

ML School Kazakhstan | Yandex Qazaqstan 2026 - 2027

Machine Learning Program, powered by YSDA - in progress

Achievements

- 40+ Coursera certificates in programming, computational mathematics and computer architecture.
- Startup Battle winner with Golden Students Club; competition included 120 teams from 5 countries.

Interests

Applied machine learning, information retrieval, computer vision, volleyball.
